3.7 Collaboration

Establishing collaborations between colleges or universities can be a beneficial and enriching endeavour. Here are steps that colleges can take to foster partnerships with other academic institutions:

1. **Identify Common Interests:** Determine areas of mutual interest, such as academic disciplines, research themes, or shared goals, that could form the basis for collaboration.
2. **Develop a Collaboration Strategy:** Clearly define the objectives and goals of the collaboration. This might include joint research projects, faculty exchanges, student exchange programs, or shared resources.
